PROFESSIONAL SUMMARY

"I'm a cybersecurity enthusiast and full-stack developer passionate about building secure, resilient digital systems. My work sits at the intersection of development and security — I write code and then try to break it. I actively participate in CTF competitions to sharpen my offensive security skills, and I contribute to open-source projects to give back to the community.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, JavaScript (React.js, Node.js), SQL
- **Cybersecurity:** Network Security & defence, Digital Forensics, Packet Analysis, Stateful Firewalls, Penetration Testing, Cryptography, Social Engineering defence, Phishing Simulation
- **Web Development:** React.js, Node.js, REST API Integration, Socket Programming, PostgreSQL
- **Operating Systems:** Linux (Kali Linux, Arch Linux), systemd-boot, UKI, Windows
- **Tools & Platforms:** Wireshark, Metasploit (conceptual), Git/GitHub, Burp suit, Photoshop
- **Design & Media:** Graphic Design, Video Editing
- **Soft Skills:** Analytical Thinking, Problem Solving, CTF Competition, Team Collaboration, Ethical Mindset

EDUCATION

Bachelor of Science — [BSc Computer Science with Cybersecurity]

2024-2027]

Sri Ramakrishna College of Arts and Science (SRCAS) | Coimbatore, India

Relevant Coursework: Network Security, Operating Systems, Data Structures, Database Management, Computer Networks, Blockchain, Python, OPP's with Java.

EXPERIENCE

Cybersecurity Intern | PREFENZO Technologies | Coimbatore, India

April 2026 to May 2026

- Contributed to network security and defensive architecture initiatives, applying practical security frameworks to protect internal systems and infrastructure.
- Assisted in identifying and mitigating vulnerabilities through packet analysis and network traffic monitoring using industry-standard tools.
- Collaborated with the security team to document findings, draft security policies, and implement best-practice configurations on Linux-based systems.
- Gained hands-on experience with firewall configuration, intrusion detection principles, and secure application deployment.

PROJECTS

PyroWall — Python | Network Security | Socket Programming | Stateful Firewall

- Engineered a fully functional, pure-Python stateful packet-filtering firewall capable of monitoring, managing, and securing network traffic flows.
- Implemented connection-state tracking, rule-based filtering logic, and real-time packet inspection to simulate enterprise-grade firewall behaviour.
- Demonstrated deep understanding of TCP/IP protocols, socket-level programming, and network defence architecture.

Phalanx Check — Python | Cybersecurity Awareness | Phishing Simulation | Ethical Testing

- Engineered an internal phishing simulation and security awareness training tool to help organizations identify human vulnerabilities before real attackers do.
- Implemented advanced safety controls including dry-run modes, configurable rate-limiting, strict target validation, and comprehensive logging for ethical, auditable testing.
- Designed with full compliance safeguards to ensure tool misuse prevention, making it appropriate for organizational security assessments.

ChainRaptor | AI Offensive Security Framework— *Python • LLM Orchestration • Cybersecurity*

- Developed an AI agent that automates security tools (Nmap, Gobuster, Nuclei) using natural language commands.
- Integrated multi-LLM support for cloud APIs (Gemini, Claude) and local offline models via Ollama.
- Built a Model Context Protocol (MCP) server to bridge security toolsets with AI-native IDEs like Cursor and Claude Desktop.
- Engineered an interactive CLI with automated dependency resolution and human-in-the-loop safety approvals.

CERTIFICATIONS & TRAINING

- Foundations of Cybersecurity Google Issued May 2026 Credential ID PWO9XK79K0C4
- VFX with Nuke workshop HCL GUVI Issued Dec 2024

COMPETITIONS & ACHIEVEMENTS

- **Actively compete in global Capture The Flag competitions, consistently placing in disk forensics, cryptography, and network attack/defence challenges — demonstrating real-world offensive and defensive security skills.** CTF Competitor (UMass CTF, Blue Hens CTF, UDCTF):
- Graphic Designer — Created brand identity materials, UI mock-ups, and visual content for [clients], showcasing cross-disciplinary technical and creative expertise.

ATS KEYWORDS

Cybersecurity | Network Defence | Penetration Testing | Digital Forensics | Python | JavaScript | React.js | Node.js | SQL | Linux | Kali Linux | Packet Analysis | Firewall | Phishing | Cryptography | Full-Stack Development | API Integration | Socket Programming | PostgreSQL | CTF | Entry Level | Internship | Security Analyst | SOC Analyst | Junior Developer | Web Developer
